**Keywords:** Cyber-Evil; Cyber Hate, Bullying, Popular Media, Law, E-Predation, E-Victimization, Aggressive E-Communication.

## **Rationale of the project.**

Cyberhate is defined as racist, discriminatory, negationist and violent statements with social network platforms like Facebook, Twitter, Instagram, amongst others. Examples could include Facebook posts promoting ideas of hatred against a community, videos, messages in forum, etc.

Prospective chapters can deal with, but **will exclude chapters on Cyber Terrorism:**

- 1- **Racism** based on alleged race, skin color, nationality, descent and national or ethnic origin, etc.
- 2- **Discrimination/Xenophobia**, on the basis of sex, gender, sexual orientation, religious or philosophical beliefs, health status, physical characteristics, etc.

The series of contributions featured in this handbook will demonstrate multi-faceted perspectives. While providing such a focus, these papers will also operate with a constantly evolving conceptualization of contemporary societies and their modern cyber-evil. This Handbook as a whole will reflect that modern cyber-evil is primarily based on human minds and activities, and on deviant uses of modern technologies, which may differ ideologically, historically and culturally on the global map of modern legal systems. This plurality of perspectives, which poses a challenge to our future, is the source of this handbook that offers a variety of foundations, legal perspectives, and popular developments in an effort to suggest measures to combat this modern cyber-evil.

## **Part I. Theoretical Foundations of E-Predation and E-Victimization**

## **Part II. Modern Cyber-Evil with legal case analyses**

## **Part III. Modern Cyber Evil in Popular Culture**
